

## Data Mesh 101: Data as a Product

<https://cnfl.io/data-mesh-101-module-3> | Data as a product, the second principle of data mesh, further delineates the data deliverables for which each domain team is responsible. Follow along as Tim Berglund (Senior Director of Developer Experience, Confluent) covers how data makes its way into products, how it can be showcased there, and how it is ideally shared with the larger organization.
